

## TIE

Trans-X Innovation Eco (TIE) was launched by Tsinghua Holdings in September, 2017 as an international technological innovation and technology services platform. We sincerely welcome partners from all over the world to join us in promoting greater collaboration, cooperation, and development in the progression from technological to industrial innovation.

We are committed to:

- Connecting domestic enterprises with overseas innovative technology projects for technological innovation integration and industrial upgrading
- Matchmaking overseas investment opportunities and looking for potential Unicorn companies from all over the world
- Enabling governments and organizations to have extensive contacts with technological, government and business leaders worldwide
- Providing supports and services for both domestic and international companies by linking capital, market and industries

## TIE Vision

## About Tsinghua Holdings

Tsinghua Holdings Co., LTD., the operator of TIE, is the biggest university-owned enterprise in the world. By making full use of Tsinghua University's advantages in scientific research and professional expertise, Tsinghua Holdings adheres to the path of integration of industry, academia, and research, having commercialized nearly 50 national advanced scientific achievements over the past 30 years. Tsinghua Holdings has developed new technologies and products that have led to the birth of new enterprises and many new sub-sectors. The unique model of industry, academia, and research collaboration created by Tsinghua Industries sets an example and draws attention from various countries and regions, including Europe, Russia, Japan, and South Korea.

In recent years, Tsinghua Holdings has applied its advanced technologies in traditional industries and helped upgrade them with necessary innovative elements. This has developed into an alternative method of industrial innovation.

### Ability to commercialize tough technologies

Commercializing 45 national advanced scientific achievements, winning 26 National Science & Technology Progress Awards and 19 National Awards for Technological Invention

Accomplishing breakthrough in over 60 key technologies

Accelerating transformation of three national advanced science and technology projects

### Innovation incubation capability

More than 200 incubation sites worldwide

Covering more than 60 cities in China

Expanding business in countries and regions in North America, South America, Europe, and Asia

### Start-up companies incubation

Incubating more than 6,000 start-up companies

Serving more than 100,000 start-up companies

37 start-up companies incubated by Tsinghua Industries since 2006

With cutting-edge technologies and industrial influence, Tsinghua Industries has cooperated with many Fortune Global 500 enterprises and 70 percent of China's top 200 enterprises in various business fields.

## Join Us!

TIE aims to facilitate industry, academia, and research cooperation and connect people across the world. Bringing technological achievements to market, we make the best use of advanced technologies and tap the great potential of innovation.

We are creating an open platform where we share resources, grow rapidly, and win together with our partners.

We sincerely want you to be our TIE partners;  
please contact us if you are interested.
