TIANJIN TOUTS ITS TOP BUSINESS CLIMATE, COMPETITIVE STRENGTHS

Tianjin, the second largest port city in China, continues to seek high-quality growth and has lured 1,699 projects with new industrial parks in Binhai. According to statistics, since 2017, Tianjin has spent 10.4 billion yuan ($1.55 billion) so far. Moreover, many companies once had lower thresholds for entering the market, but now they have slashed their service fees and increased efficiency, aiming to join the global business environment. The survey benchmarked some companies and found that Tianjin has recovered and seen a steady growth in its GDP, which is 7.9% higher than other investment environments.

Of the nine global bird migration routes, two pass through Tianjin, which is a key place for birds to perch, rest, breed or spend their winter. Dahuangbao, which cover a total area of 876 square kilometers, is an intergovernmental project between China and Singapore. It is an intergovernmental project aimed at becoming the world's first full-fledged smart city.

The eco-city is an experiment to integrate manufacturing production with the digitalization and integration of traffic control and systems via smartphones and tablets. The residents are enjoying the use of new technologies and applications, such as thermal, visual, and other intelligent systems having functions such as visual and audio to support the residents with intelligent facilities. The data and information platform is planned to be launched in the coming years. The integration of traffic control and systems via smartphones and tablets will help streamline administrative procedures in businesses and lower the threshold for private companies.

According to some recent reports evaluating the business environment, Tianjin is well-positioned and is turning to become a major commercial center, connecting with 500 ports in 180 countries and regions. The city is focusing on its ecological protection and environmental efforts. The survey found that Tianjin has made steady progress in strengthening its historic position of a hub of business growth. The government wishes to foster home champions and support the next generation AI industry in Tianjin's Binhai New Area. The eco-city is expected to achieve a top business climate and competitive strengths.

Edward Tse, founder and CEO of Gao, said Tianjin's Binhai New Area announced its favorable investment climate and the rise steadily each year, thanks to the government's resolution to implement the coordinated development strategy of the world's leading ecological city. The government is interested in fostering home champions and supporting the next generation AI industry in Tianjin's Binhai New Area, which held its help in recent reports evaluating the business environment.
