

Welcome to Zhanjiang

Zhanjiang is located in the southernmost part of the Chinese mainland, the southwest of Guangdong Province and the conjunction area of Guangdong, Guangxi and Hainan provinces(regions). With a resident population of 7,241,400 and an area of 13,260 square kilometers, Zhanjiang has five Counties(cities), four districts, one state–level economic and technological development zone, and six provincial–level economic development zones under her jurisdiction. As one of the first coastal cities opening up to the outside world in China and one of the national top 100 cities with comprehensive strength, Zhanjiang has won a number of titles in recent years, such as China Excellent Tourism City, National Garden City, China's Top 10 Leisure City, Capital of China's Seafood, Capital of China's Shrimp, Health and Civilization City of Guangdong Province, and so on.

As a harbor city with advantaged position, abundant tropical resources, beautiful environment, booming port industries, Zhanjiang, the ecological bay city, sincerely invite our friends across the world to gather in the most southern part of the Chinese Mainland.

Park Development and construction

1

1 Development and Construction of Industrial Parks

NO.1

Project: Infrastructure project of Guangdong Fenyong–ASEAN Industrial Park

Overview: Build four road, total 3.62km. Includes road project, landscape engineering, streetlight project, general drainage network, electricity network , traffic signs, etc.

Mode of cooperation: Sino-foreign joint venture

Period of cooperation: Long-term

Total investment: RMB150 million

Chinese side's investment and composition: Negotiable

Investment and organization of the overseas parties: Negotiable

Estimated payback period: Negotiable

Construction site: Zhanjiang Fenyong High-tech Industrial Development Zone

Infrastructure available at the construction site: Water and electricity

State project classification: The provincial key projects

Materials Information of project:

Project Contact: Miss He

Tel: 86-13169131314

Fax: 86-759-8156126

Address: Zhanjiang Fenyong High-tech Industrial Development Zone, Guangdong Province

Post Code: 524232

E-mail: fyzs@fenyong.gov.cn

Website: www.fenyong.gov.cn

Brief Introduction of Chinese sides

Company briefing: Zhanjiang Fenyong High-tech Zone is located in southwest of Guangdong. The park covers a total area of 46 square kilometers with a population of 5822. The predecessor of the park was Fenyong Overseas Chinese Farm established since 1952. Over 3800 residents are returned overseas Chinese or their family members from 13 countries (regions) such as Indonesia, etc. On May 15, 2012, Fenyong Economic Zone was founded. In July, 2012, Guangdong Fenyong–ASEAN Industrial Park was set up under approval of Guangdong Provincial Government.

Company technology and operation situation: There are already 21 enterprises settled down in the industrial park, with a total investment over RMB 4 billion. The estimated output value will achieve 5.52 billion RMB in 2018, and will bring over 300 million tax to Guangdong Fenyong–ASEAN Industrial Park.

NO.2

Project: Infrastructure project of Fenyong Military-civil Combined Demonstration Base

Overview: Build five road, total 6.45 km. Includes road project, landscape engineering, streetlight project, general drainage network, electricity network , traffic signs, etc.

Mode of cooperation: Sino-foreign joint venture

Period of cooperation: Long-term

Total investment: RMB280 million

Chinese side's investment and composition: Negotiable

Investment and organization of the overseas parties: Negotiable

Estimated payback period: Negotiable

Construction site: Zhanjiang Fenyong High-tech Industrial Development Zone

Infrastructure available at the construction site: Water and electricity

1 Development and Construction of Industrial Parks

NO.3

Project: Forest Industrial Park in Mazhang District, Zhanjiang

Overview: Mazhang District Forest Industrial Park is located in the north of Taiping Town, in 2030, the industrial park will be developed to 22 square kilometers and the total scale in future reaches 30 square kilometers. Comprehensively considering the development condition, the controlled detailed planned area of Phase I is 12.95 square kilometers, and the planned area of starting area is 5.5 square kilometers. The leading enterprises having entered the park, and been completely constructed and put into production consist of Zhanjiang Guanhao Paper Co., Ltd. (originally called Guanlong) and Zhanjiang Chenming Paper Co., Ltd. The general positioning of Mazhang District Forest Industrial Park: A worldwide first-rate and nationwide largest forest industrial park based on standardized construction, grid management and corporate entity responsibility implementation of “forest-pulp-paper”, “forest-board-furniture” as well as printing and packaging, through innovations in new biologic material, under the guidance of cyclic economic development concept and highlighted by the modern forest industry high and new technology.

Mode of cooperation: to be negotiated

Period of cooperation: to be negotiated

Total investment: to be negotiated

Chinese investments and their composition: to be determined

Foreign investments and their composition: to be determined

Estimated payback period: to be determined

Construction site: Forest Industrial Park in Mazhang District, Zhanjiang

Infrastructure available at the construction site: the planning and construction and supporting of “nine-connections and one-leveling” is complete .

NO.4

Project name: Haidong New Area Large-scale Industrial Park Project

Project profile: Located in Haidong New Area Scientific and Technology Industry Leading Enterprise Park, the project covers an area of 728 hectares. The industrial park borders Zhanjiang International Airport in the east, Coastal High-speed Railway Huangpo Station in the west, National Highway 325 in the north and it is near Guangzhou-Zhanjiang Expressway. The industrial park will be composed of processing, production, and comprehensive service areas. Seven industrial areas, namely energy conservation and environmental protection, new materials, high-end equipment and machinery manufacturing (precision instruments and meters, precision machine tools), auto parts manufacturing, electronic information (household appliances), food deep processing, marine biological medicine and medical equipment and instruments will be arranged here.

Cooperation mode: (1) Independent site selection and plant construction (2) Rent standard plants inside the industrial park

Duration of cooperation: Negotiable

Project site: Haidong New Area Scientific and Technology Industry Leading Enterprise Park

Available infrastructures: Land leveling, rain pipes, sewage pipes, telecom cables, thermal pipes, power supply wires, water supply pipes, natural gas pipes, cable TV and access roads have been promoted

Entry conditions: Investment intensity RMB 2 million/0.06 hectare, revenue RMB 100,000/0.06 hectare

Project owner: Zhanjiang Potou District Investment Promotion Service Center

Contact person: Huang Kangchao

1 Development and Construction of Industrial Parks

NO.5

Project: Development and construction projects for Leizhou pearl industrial park

Overview: The project of Liusha Pearls Industrial Park mainly involves the items of pearls farming, processing and selling, the planning sea area is 3,000 acres, the surrounding development area is 40 thousand acres. The project construction of Pearls Industrial Park is divided into five parts: the first is to build a 1000 acres pearls mariculture area at Liusha port; the second is to build a 2000 acres area for cultivating pearls at sea area of Liusha port; the third is to build excellent original pure seedling field, which is in charge of supplying free spats of the pearly shellfish(mother of pearl); the fourth is to build of a standard and normative platform base of 80 acres; the fifth is to build of a complex building of 20 acres with the company office, processing plants and laboratories in the offshore area. The construction of the breeding base industrial chain of entire Pearls Industrial Park is divided into four parts: the first is the construction of the industrial chain of hatching pearl spats, inserting pearls, breeding and selling, breeding; the second is the creation of pearls technology research and development base; the third is the creation of the "Internet + equity" cooperation platform; the four is the creation of a platform with pearls museum, pearls trading center and pearls culture research.

Total investment: 500 million yuan

Mode of cooperation: Solely owned, joint venture or cooperative

Period of cooperation: 40

Composition of Chinese investment: to be negotiated

Composition of foreign investment: to be negotiated

Estimated payback period: 10 years

Construction site: Tandou Town, Leizhou City

Investment Promotion Department: Leizhou People's Government

Project Contact: Chen Danzong

Tel: 86-13802348383

Fax: 86-759-8815454

NO.6

Project name: Lianjiang Electronic Industrial Park

Project profile: A production base of high-tech electronic products and components and parts such as automation control, household appliances, communication and network will be established.

Cooperation mode: Joint venture, cooperation, sole proprietorship

Duration of cooperation: 50 years

Total investment: RMB 1.2 billion

Chinese investment and composition: Negotiable

Foreign investment and composition: Investment in form of capitals, equipment or technology

Expected payback period: 5-10 years

Project site: Lianjiang Economic Development Zone

Available infrastructures: Water supply, power supply, access roads and land leveling.

Project information: High-tech electronic industry has high technical content, high added values of products, and lucrative returns on investment. As a result, the integration of electronic information and industrialization can enhance the competitive power of conventional industries. The development of electronic information industry will promote social employment, attract the arrival of numerous high-tech talents, improve regional S & T contents, and drive the development of other relevant industries. At present, the research and development conditions for the electronic industry have been available in the city.

Project category: Encouraged project

1 Development and Construction of Industrial Parks

NO.7

Project name: Wuchuan Huayu Industry Transfer Industrial Park (Phase II)

Project description: the goal of Phase II of the Industrial Park is to construct China (Zhanjiang) International Ocean Industry Center composed of three parts of marine products processing area, marine products futures trading and displaying area as well as ocean industry R&D, marine biopharmaceuticals and marine health care products production etc. supplemented with import & export joint inspection, bonding, logistics and commercial, living mating to create the largest ocean aquatic product gathering and distributing trading market in the west of Guangdong Province, an influential ocean aquatic product futures trading center and an important marine bio-pharmaceutical manufacturing base and industry-university-research cooperation base.

Ways of cooperation: joint venture, sole proprietorship

Duration of cooperative operation: To be negotiated

Aggregate investment: supporting funds based on project construction scale

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

Expected pay back period: TBC

Construction project site selection: Wuchuan Huayu Industry Transfer Industrial Park, Guangdong Province

Existing condition: The Park is located in the Golden Triangle of Huangpo Town, Wuchuan City. It is affirmed by the Province in Aug, 2007 as the provincial level industry transfer park with total planning area of 7250mu and developed & constructed in three phases. 1200mu of Phase I have been developed and at present 22 large and medium-scale enterprises station in the Park with 11 of them constructed and put into operation. The six utilities and one leveled land of 2500mu Phase II have been completed so that the above-mentioned industrial projects can be undertaken by the Park.

This project is part of which type of national project: permitted type

2 Technical Industries and Financial Services

NO.5

Project name: Modern Agriculture Demonstration Core Area of Leizhou Peninsula of Guangdong Province

Project outline: The total area of modern agriculture demonstration core area of Leizhou Peninsula of Guangdong Province is about 125k mu. The development construction in Phase I is 9,678.3 mu with investment of about 830 million RMB. The development of the Park mainly includes six functional zones of comprehensive service area, agricultural dual creative incubator, high standard agricultural science and technology integrated demonstration area, agricultural science and technology innovation integration demonstration base, processing logistics and trade exhibition area and high-quality agricultural products expo park of Leizhou Peninsula. It mainly has the functions of modern science and technology integrated innovation application, Internet + agriculture, tropical crops for two breeding, standardized production for tropical crops and integrated services and training services of modern agricultural machinery. Meanwhile, leisure agricultural functions of leisure sightseeing, picking experience and science dissemination and demonstration are injected. These effectively radiate and drive the comprehensive three-dimensional development of modern agriculture in the city, promote the integration and interaction of primary, secondary and tertiary industries to make it become the national leading and world-class display area, model area and demonstration area of modern featured agriculture.

Ways of cooperation: cooperation, joint venture

Duration of cooperative operation: long-term

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

Expected pay back period: to be discussed

Aggregate investment: to be discussed

This project is part of which type of national project: This project has been included into national major agricultural projects.

Construction project site selection: Zhanjiang Nongken Guangqian Sugar Industry Development Co., Ltd., Chengyue Town, Suixi County, Zhanjiang, Guangdong Province (around Luogang Ridge)

Infrastructure condition supplied by project funds introduction place: complete infrastructure of water, electricity, communication, transportation and tourism service.

Project unit: Guangdong Dingxian Agricultural Investment Co., Ltd.

Project contact: Li Kangbao

NO.1

Project: Baoman Container Terminal Phase 1

Overview: Two special berths for 50,000t containers (designed with 150,000t structure) will be constructed. The wharf has a total length of 678m, the harbor has a depth of 1,000m, the land covers 678,000 square meters, and the designed annual through capacity is 800,000 TEUs.

Mode of cooperation: to be negotiated

Period of cooperation: to be negotiated

Total investment: 2.3 billion yuan

Chinese investments and their composition: to be negotiated

Foreign investments and their composition: to be negotiated

Estimated payback period: to be negotiated

Construction site: Baoman Harbor area

Infrastructure available at the construction site: water and electricity supply and road traffic opening, site leveling

Investment Promotion Department: Zhanjiang Harbor (Group) Co., Ltd.

Project Contact: Wang Cuiting

Tel: 86-759-2255216

Fax: 86-759-2288164

Address: No. 1, Youyi Road, Xiashan District, Zhanjiang City

Post Code: 524027

Attachment: Basic conditions of Chinese part

Corporate profile: Zhanjiang Harbor (Group) Co., Ltd. is the largest public wharf operator in Zhanjiang Harbor, now owns Xiashan Harbor, Tiaoshun Island Harbor and Baoman Harbor, is continually constructing Baoman Harbor, and is newly constructing Donghai Island Harbor.

The enterprise's existing technical level and operation status:

It currently owns 37 production berths, twenty-eight 10,000t above berths, one 300,000t bulk cargo berths (400,000t hydraulic structure), two 300,000t crude oil berths, one 250,000t iron ore berths, one 150,000t coal berth and two 50,000t container berths (150,000t hydraulic structure) and an annual through capacity of 0.11 billion tons. In 2015, the goods handling capacity was 87.14 million tons, including 0.6008 million TEUs of container handling capacity.

NO.2

Project: Zhanjiang Bonded Logistics Center (B)

Overview: It is located behind the Baoman Harbor of Zhanjiang Harbor, the land used covers 0.412 million square meters, and the annual logistics quantity reaches 4.75 million tons. Wherein, the land of Phase I covers 0.21 million square meters, including the 50,000 square meters constructed warehouse, and the 51,000 square meters storage yard as well as supporting inspection area, auxiliary construction area, office area, etc., and the annual handling capacities of container and breakbulk cargo are 110,000 TEUs and 400,000 tons respectively.

Mode of cooperation: to be negotiated

Total investment: 0.615 billion yuan

Chinese investments and their composition: to be negotiated

Foreign investments and their composition: to be negotiated

Estimated payback period: to be negotiated

Construction site: Baoman Harbor area

Infrastructure available at the construction site: water and electricity supply and road traffic opening, site leveling

NO.4

Project name: Haidong New Area Large-scale Logistics Park Project

Project profile: Located in the south of Haidong New Area Scientific and Technology Industry Leading Enterprise Park, the project covers an area of 666.66 hectares. The industrial park borders Zhanjiang International Airport in the east, Coastal High-speed Railway Huangpo Station in the west, National Highway 325 in the north and it is near Guangzhou-Zhanjiang Expressway. With such convenient traffic conditions, the project is designed to serve Zhanjiang Airport Economic Circle and provide powerful logistics supports for Haidong New Area Large-scale Industrial Park Project so as to make an international, modern and intelligent Zhanjiang logistics center with complete functions. The key potential customers include domestic and international well-known logistics infrastructure providers and leading enterprises related to international trade, transnational retail, third-party/fourth-party logistics, and trade settlement at home and abroad will be introduced. According to the planning, a distribution center of industrial raw materials and products, a warehouse center and a cargo handling center will be established. The project will be a comprehensive logistics park combining warehousing, handling, processing, shipment, information, distribution, parking, catering, accommodation, and commerce and trade.

Cooperation mode: Negotiable

Duration of cooperation: Negotiable

Total investment: Negotiable

Chinese investment and composition: Negotiable

Foreign investment and composition: Negotiable

NO.5

Project name: Airport Economic Zone Logistics Park Infrastructure

Project description: with the relocation of Zhanjiang International Airport to Tangduo Town of Wuchuan as the turning point, the airport economic zone construction is planned. The Airport Economic Zone is composed of two parts of Tangduo Town and Zhangpu Town Industrial Park with total area about 164.82 m² (where Zhanjiang International Airport air-traffic construction control zone area is about 19 m²). Its development orientation is the important portal for Guangdong Province to participate in “The Belt and Road” Construction and ASEAN cooperation, pioneering demonstration plot of central city in constructing Beibu Gulf Rim urban agglomeration in Zhanjiang, airport economic agglomeration area led by airport advanced manufacturing and modern service. It has four principal dominant functions of constructing international portal in western Guangdong Province, regional logistic hub, modern service highland, high-tech industrial base etc. In meantime of airport construction, the infrastructure of “seven facilities and one leveled land” for the Airport Economic Zone Logistics Park with total area of 1500mu will be built.

Ways of cooperation: joint venture, sole proprietorship

Duration of cooperative operation: To be negotiated

Aggregate investment: supporting funds based on project construction scale

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

Expected pay back period: TBC

Construction project site selection: periphery of Wuchuan Tangduo Zhanjiang International Airport new address and Yunzhan Expressway, Shenzhan High-speed Rail Tangduo Town access

Existing condition: the relocation work of Zhanjiang International Airport has been started.

This project is part of which type of national project: permitted type

Project unit: Wuchuan Zhanjiang International Airport relocation work frontline headquarters

Project contact: Zhang Guoqiang

NO.1

Project name: Aromatic Hydrocarbon Comprehensive Utilization Industry

Project outline: it is planned to develop the aromatic hydrocarbon deep processing industrial chain and construct disproportionate, PX and o-xylene devices. Major investment fields include styrene deep processing, purified petroleum benzene deep processing, disproportionate device, PX device and o-xylene device etc.

Ways of cooperation: sole proprietorship, joint venture, cooperation

Duration of cooperative operation: 50 years

Aggregate investment: depending on specific scale

Chinese investment and constitution: to be discussed

Foreign investment and constitution: to be discussed

Expected pay back period: 5-10 years

Construction site: Donghai Island of Zhanjiang Economic and Technological Development Zone
Infrastructure available at the construction site: Petrochemical industrial park with a total area of 30 square kilometers

Investment Promotion Department: Development and Reform & Investment Promotion Bureau of Zhanjiang Economic and Technological Development Zone

NO.2

Project: Polyurethane Industry in Zhanjiang Economic and Technological Development Zone

Overview: Polyurethane Industry in Zhanjiang Economic and Technological Development Zone

Overview: Develop polyurethane raw materials including 1,4-butanediol (BDO), adipic acid, polyether and organic amine by propylene oxide (PO) and ethylene oxide (EO) produced in Sinopec and Sino-Kuwait Refinery and Petrochemical Project to guarantee the polyurethane raw materials supply. Meanwhile, import series products of isocyanate for deep processing by taking advantage of the port, and produce polyurethane adhesives, coatings, elastomers, synthetic leather pulp and soles products with market advantages.

Mode of cooperation: Solely owned or joint venture or cooperative

Period of cooperation: 50 years

Estimated payback period: 5 to 10 years

Construction site: Donghai Island of Zhanjiang Economic and Technological Development Zone

Infrastructure available at the construction site: Petrochemical industrial park with a total area of 30 square kilometers

Investment Promotion Department: Development and Reform & Investment Promotion Bureau of Zhanjiang Economic and Technological Development Zone

Project Contact: Cai Zhiyong, Dai Yunsheng

Tel: 86-759-2968998 / 2968986

NO.3

Project: Synthetic Materials Deep Processing Industry in Zhanjiang Economic and Technological Development Zone

Overview: Make full use of raw materials such as polythene, polypropylene, polycarbonate and polystyrene to deeply process a series of synthetic materials highly-processed products with good market prospect. Synthetic materials deep processing projects include: post processing of polypropylene, whose main products are short fibers used for building, thermoplastic elastomer and low foamed sheet; post processing of polythene, whose main products include cable, special film, new hollow container and co-extrusion heat-shrinkable film; modified plastic materials and alloy whose raw materials are PE, PP, PC and rubber; polystyrene insulation board and so on.

Mode of cooperation: Solely owned or joint venture or cooperative

Period of cooperation: 50 years

Estimated payback period: 5-10 years

Construction site: Donghai Island of Zhanjiang Economic and Technological Development Zone

Infrastructure available at the construction site: Petrochemical industrial park with a total area of 30 square kilometers

Investment Promotion Department: Development and Reform & Investment Promotion Bureau of Zhanjiang Economic and Technological Development Zone

Project Contact: Cai Zhiyong, Dai Yunsheng

NO.4

Project: Fine Chemical Industry in Zhanjiang Economic and Technological Development Zone

Overview: In paint series, main products include automobile paint, marine paint, new building coating and matched resin. In food additive series, it mainly develops convenient food additives and special nutrition food additives. In cementing compound series, key products include building sealant, high grade polyurethane adhesive, high performance epoxy glue, PVC hot melt adhesive and silicone building sealant. In electronic chemicals series, it mainly develops epoxide resin used for printed circuit board (PCB), dry film resist, new electrical packaging materials and liquid photographic imaging resistance flux. In paper chemicals series, it mainly develops waste paper recycling chemicals, neutral sizing agent, styrene-acrylate emulsion, and different chemicals for treating and recycling white water and the treatment of wastewater from paper making. And in plastic additive series, key products include: ① different plasticizers, such as phosphoric acid plasticizer, fatty acid ester plasticizer, citrate plasticizer and epoxy ester plasticizer; ② efficient, nontoxic, dust-proof, high molecular, multi-functional and professional antioxidants; ③ low toxic, nontoxic, compound and special rare earth heat stabilizers as well as calcium-zinc compound heat stabilizers for PVC; ④ inorganic flame retardants and ⑤ impact modifier, like ACR, MBS, etc.

Mode of cooperation: Solely owned or joint venture or cooperative

Period of cooperation: 50 years

Estimated payback period: 5-10 years

Construction site: Donghai Island of Zhanjiang Economic and Technological Development Zone

Infrastructure available at the construction site: Petrochemical industrial park with a total area of 30 square kilometers

NO.5

Project Name: Guangdong Zhanhua Group Co., Ltd. Transformation, Upgrading and Relocation Project

Project Overview: The project is located in Donghai Island Petrochemical Industrial Park of Zhanjiang Economic and Technological Development Zone, 430 acres land is planned to be used in the first period.

The project construction is based on the advantages of the company in the field of phosphorus chemical industry, combined with industry and development trends. It will optimize the product structure and produce high concentrations water-soluble fertilizers, multi-functional compound fertilizer, industrial phosphoric acid and its phosphate products in line with modern agricultural development needs. The advanced technology used in the project is environment-friendly, safe and reliable.

Mode of cooperation: To discuss

Years of cooperation: To discuss

Total Investment: 3.65 billion yuan

Chinese Investment and Composition: Interview

Foreign Investment and Composition: Interview

Expected payback period: 8 years

Construction site: Donghai Island Petrochemical Industrial Park

Condition of fundamental facility that the capital can provide:

The project is located close to the port, a special railway line was set up for the plant, and the surrounding highways extend in all directions, which make the transport condition extremely superior; water supply and power supply are also in good condition.

NO.1

Project: Mechanical Equipment Manufacturing Project in Zhanjiang Economic and Technological Development Zone

Overview: develop the port vicinity advantages of Zhanjiang, use the high-quality steel produced in the iron and steel base, and mainly develop the heavy and new equipments for machinery industry. Zhanjiang machinery industry will choose the following products with large market developing potential: marine equipments, port and handling machinery, metallurgical equipments, energy saving and emission reduction equipments, etc., and matching products as well as components and parts, including roller, castings and forgings, common components and parts, etc. Starting from high technological products, the project produces high technical and high value-added products. It is preliminarily planned that the development scale of equipment manufacturing industry will be 255,000 tons.

Mode of cooperation: Solely owned or joint venture or cooperative

Period of cooperation: 50 years

Estimated payback period: 5-10 years

Construction site: Donghai Island of Zhanjiang Economic and Technological Development Zone

Infrastructure available at the construction site: 6 km² planning area for iron & steel supporting project

Investment Promotion Department: Development and Reform & Investment Promotion Bureau of Zhanjiang Economic and Technological Development Zone

NO.2

Project name: Household Appliance Manufacturing Enterprise

Project outline: developing household appliance supporting industry by utilizing the high quality household appliance panel produced in Zhanjiang Iron and Steel Base, such as the compressor products supplied to refrigerator, air-conditioner, absorbing the domestic compressor manufacturing industry to transfer to Zhanjiang Area. It is planned to carry on the industrial transfer of household appliances in Pearl River Delta relying on the new large-scale steel construction project of Baosteel and form a new household appliance production base in Guangdong. Compressor is one of the main auxiliary products for household appliances. It is planned to utilize hot rolling acid pickling panel to produce the housing for freezer compressor and air condition compressor. The planned compressor project has an annual scale of production 4.5million sets (where freezer compressor total 2.5million sets and air condition compressor 2million sets).

Ways of cooperation: sole proprietorship, joint venture, cooperation

Duration of cooperative operation: 50 years

Aggregate investment: depending on specific scale

Chinese investment and constitution: to be discussed

Foreign investment and constitution: to be discussed

Expected pay back period: 5-10 years

Construction project site selection: Donghai Island in Zhanjiang Development Zone

Infrastructure condition supplied by project funds introduction place: steel supporting project covers an area of 6 km²

Project material condition: related documents about the state has approved to found Donghai Island New District and related documents on merging Zhanjiang Economic & Technological Development Zone and Zhanjiang Donghai Island Economic Development Zone; approval replay on Baosteel Zhanjiang Iron and Steel Base Project

This project is part of which type of national project: encouraged type

NO.4

Project name: Equipment Manufacturing Base of Mazhang District

Project outline: the district plans to newly build an equipment manufacturing base covering an area of 1000mu in Taihe Industrial Park. Enterprises could invest enterprise projects like equipment manufacturing, machinery production etc. relying on the raw material advantage and traffic location advantage of Zhanjiang steel projects. Mazhang District Industrial Park is located in the traffic hub linking east and west in Zhanjiang as the access to Hainan and the Great Southwest, owning traffic advantages of harbor, railway, expressway, national highway etc.; Zhanjiang's ten million ton iron and steel complex is only 15 minutes' distance to Mazhang District Industrial Park. Denihua Vehicle Parts Company has stationed in it and put into production.

Ways of cooperation: sole proprietorship, cooperation

Duration of cooperative operation: To be negotiated

Aggregate investment: To be negotiated

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

Expected pay back period: TBC

Construction project site selection: Mazhang District Industrial Park

Infrastructure condition supplied by project funds introduction place: five facilities and one leveled land

Project material condition:

This project is part of which type of national project:

NO.6

Project name: Down Feather Industrial Base Phase II Down Garment Project

Project description: at present Wuchuan has more than 100 down feather enterprises, over 50 washing down feather production lines, 30 high down feather production lines with annual output value over 2billion RMB and advanced production, inspection, and testing equipment. The products are mainly of down feather raw material and down feather series products. In 2005 it was awarded the title of “home of Chinese down feather” and in 2008 identified as “Guangdong Down Feather Industrial Cluster Upgrading Demonstration Plot”. During Phase I of the industrial base, many down feather enterprises have been constructed and put into operation. Now the land of 80,000 m² and infrastructure in Phase II can afford the entry of 2-4 down feather and home textiles high-end enterprises.

Ways of cooperation: joint venture, sole proprietorship

Duration of cooperative operation: To be negotiated

Aggregate investment: supporting funds based on project construction scale

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

Expected pay back period: TBC

Construction project site selection: District A, B of Guangdong Wuchuan Economic Development Zone Industrial Park

Existing condition: Phase I has been completed, and infrastructure of water, electricity, road, communication etc. can be extended to Phase II.

This project is part of which type of national project: permitted type

Project unit: Guangdong Wuchuan Administration Committee of Economic Development Zone

Project contact: Chen Yaohua

NO.4

Project name: Jiulongshan Natural Scenic Area Tourism Development Project of Leizhou

Project outline: The Jiulongshan Natural Scenic Area Project to be developed and constructed is located in Jiulongshan, Tiaofeng Town, about 44 km away from Leizhou and 6 km from Tiaofeng Town Dyke. The scenic area is surrounded by mountains, with a steady flow of streams and a convergence of nine mountains like nine dragons playing in the water, thus the name Jiulongshan. The scenic area boasts Jiulongshan Mangrove National Wetland Park of Leizhou, Guangdong Province and Baolin Temple, the largest temple in western Guangdong Province. Here visitors may appreciate such wonderful views as Nine Dragons Playing in the Water, The Three Ridges of the Sun, the Moon and the Star, The General Holding His Knife, The Emperor's Throne, The Tree Growing out from a Stone and The Palace Maids' Bath. All these wonderful natural landscapes are accompanied by beautiful myths and legends, triggering people's infinite reveries. Jiulongshan is a landscape out of ancient volcanic eruptions, with thousands of mountains and rocks with varied shapes and graceful original mangrove forests. The project setting is beautiful and the wetland ecosystem is preserved comparatively well. The planned project will cover an area of 6,000 mu and a vast land is waiting to be developed. Through comprehensive development, the area will be created into a 4A-level eco-tourism scenic spot with multi-functions integrating ecological tourism, leisure, experience and health. After signing the project contract, the investor will design the construction programs. Then the local government will join in and make examinations and approvals, after which development and construction will begin.

Ways of cooperation: sole proprietorship or joint venture

Duration of cooperative operation: 50 years

Aggregate investment: 1 billion RMB

Chinese investment and constitution: TBC

Foreign investment and constitution: TBC

NO.5

Project name: Yuanyang Spring Leisure Ecological Farm Village Project of Leizhou

Project outline: The project to be developed and constructed is located in the vicinity of Yuanyang Team of Fengshou Sugar Co. Lim. in southwestern Tiaofeng Town, Leizhou, about 50 km away from Leizhou City, 15 km from Jiulongshan National Wetland Park in Tiaofeng Town, and 20 km from Qingtongyang, the largest dry marr lake in China. The planned land area is 6,000 mu with construction area of about 150,000 m². The project regional environment is beautiful with six springs flowing steadily. The spring water is crystal clear, delicate and slightly sweet, warm in winter and cool in summer. The wetland ecosystem is preserved comparatively well, with good ecological base and resources and a vast land waiting to be developed. In particular, the project is located in-between Jiulongshan National Wetland Park in Tiaofeng Town and Qingtongyang, the largest dry Marr in China. Through spot development and linking series of spots, eventually the planned area, together with Jiulongshan and Eagle Peak Volcanic Geological Park, will be created into a 4A eco-tourism area focusing on holiday spending and integrating multi-functions of eco-tourism, leisure, experience and health.

NO.8

Project name: Raw Sugar Deep Processing Industrial Project

Project profile: Rated as "No.1 Sugar County in China", Suixi County is a major place for planting sugarcanes and producing sugar. Each year, the area of planting sugarcanes is about 44,000 hectares in the county, and there are eight sugar enterprises in Suixi; the total daily sugar pressing capacity reaches 40,000t, and the annual sugar output is about 250,000t. However, the production equipment in the county is old and used, the production efficiency is low and products are single and similar, which seriously restrict the development of the sugar industry in Suixi County. In order to promote the transformation and upgrading of the sugar industry and enhance the added values of products, it is planned that Lingbei Industry Cluster Area can be used as platforms to introduce raw sugar deep processing projects, establish sugaring industrial clusters such as new type sugaring, sugar deep processing, and modern logistics, and accelerate the development of sugar deep processing products in Suixi County.

Cooperation mode: Sole proprietorship or cooperation

Duration of cooperation: Negotiable

Investment estimation: Specific investment can be determined as per cooperation mode and construction scale

Project site: Inside Suixi County

Project owner: Suixi County Investment Promotion Bureau

Contact person: Chen Lijun

Tel: 86-759-7775868

Mobile: 86-15917578018

Address: No.31 Zhanchuan Road, Suicheng Town, Suixi County

Email: sxzs168@163.com

NO.9

Project name: Lianjiang Capital of Agricultural Food Industry

Project profile: By promoting agricultural supply side structural reforms in a comprehensive manner, establish a platform for agricultural food industry and make the industrial chain development system for agricultural foods, and connect the steps such as R & D, production, processing, distribution and marketing based on the planning of major functional areas and the layout of advantageous agricultural products so as to make innovations for the modern agriculture in Lianjiang.

Cooperation mode: Joint venture, cooperation, sole proprietorship

Duration of cooperation: 50 years

Total investment: RMB 2 billion

Chinese investment and composition: As appropriate

Foreign investment and composition: Investment in form of capitals, equipment or technology

Expected payback period: 5-10 years

Project site: Lianjiang City

Available infrastructures: Water supply, power supply, access roads and land leveling.

Project information: As an important agricultural area in Guangdong and one of modern agricultural demonstration areas in China, Lianjiang has outstanding natural conditions, abundant agricultural resources. Based on the agricultural products resources and industrial base of Lianjiang City, the brand effects such as “Home of Blood Oranges in China” and the direct advantages from the ASEAN and Beibu Gulf Economic Circle can be utilized to introduce strategic cooperative investors, build up large-scale modern logistics industrial parks, promote the development of rural E-commerce, develop rural leisure tourism, cultivate livable and suitable featured villages and towns, and establish business groups by industry and help them go public.

Project category: Encouraged project
