Eighteen years is time enough for an entity to grow into an adult, and it is also plenty of time for an experimental industrial park to mature into a prosperous new district.

Over the years, the Suzhou Industrial Park has emerged as a marvelous new zone within a city that is capable of attracting businesses and entrepreneurs from around the world. In the colorful days of May, the Suzhou Industrial Park has launched a series of activities to celebrate its 18th birthday.

As marks this grand anniversary, there is much to encourage people, entrepreneurs and government leaders within the park. Suzhou, a new city rising in Jiangsu Province, has been transformed into a brand new district.

The total investment is expected to amount to 28.5 billion yuan, and the construc-
tion leaders within the park.

The park has a thank-you for the experience it has gained from Singapore, according to man-
gagement. The park sent 185 profes-
sional managers to Singapore to attend soft skill training, two and biology man-
neer technician to TJC Corporation of Singapore for the (job training in technology and science career
talker, planning, construction and management, effectively propelling the second round of startup development in the park and marking a new stage of its strategic goal.

The park’s opening ceremony was held in an adult, and it is also
8 of which will be 450 and 500
square meters.

In 1994, the administrators of the industrial park selected nine features that benefit from the country’s vast experience in urban planning and manage-
ment. The success of the park can be viewed as a result of the integration of three aspects, that is, market economy, urban planning, construction and management; and social public administration, said its administrative committee director Yang Chengling.

The park has absorbed much of the best features of the Singaporean model in terms of the objective and develop-
ment pattern, which has pushed the industrial park to become increasingly integrated into the global economic system.

During the last ten years, more than 2,000 people from the industrial park have been sent to receive training, and every one of them was shocked by the meticulousness of the model, its systematic and humanized attitude of the Singaporeans.

There are also several things for the leadership of the indu-

rial park to learn from the Singapore model, as it guides the park to become a mature powerhouse capable of driving the surrounding areas.

The park has matured into a prosperous new district.

The park is the biggest cooperative project between the government of China and Singapore. And the China-Singapore Jiangsu Industrial Park for opening-up and reform and a successful paradigm of international cooperation. It is also a mature model and most globally competitive development zones in the world.

The experience of the Singaporean model has become the foundation for the park’s strategy of going global.

Going global

In 2011, the opening ceremony, having just been appointed Party secretary of Suzhou City Committee, embarked on an inves-
tigation of the park.

After listening carefully to the introduction of the park’s development, he said “the experiences and management model of the industrial park can be applied in Jiangsu and other places as well”.

He said the park is well on its way towards driving its own development rather than relying on outside forces.

The experience of the Singapore model has been intro-
duced to the industrial park and is now ready for export.

The park of the China-Singapore Industrial Park in 2006 symbolized the beginning of the Suzhou Industrial Park.

“We should also widen our vision to let this model be applied in Jiangsu and other places as well”.

It is also one of the fastest-developing and most globally competitive zones in the world.
